

# GWS 121 JAW FOLDER

## Global Web Systems

The GWS 121 Folder is a high speed jaw folder with a "two around" tuck cylinder for a stable and consistent web pull. The GWS 121 folder has an adjustable jaw mechanism and will fold single or multiple webs with extreme accuracy. Designed with backbone first delivery, it is ready for inline stackers and inserters. Processing many features of higher priced folders, the GWS 121 folder offers supreme adaptability to many types of folding requirements. The little brother to the GWS 221 folder, it's a capable performer when page capacity is not the primary need.

# GWS 221 JAW FOLDER

## Global Web Systems

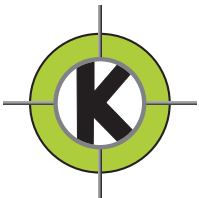

The GWS 221 Folder is a heavy duty, high speed "two around" jaw and "two around" tuck cylinder folder. The GWS 221 folder is designed to work with both single and double circumference printing units. While capable of high page capacity, the GWS 221 delivers high speed folding accuracy at lower page counts. Built to be a consistent performer, the GWS 221 has the durability and accuracy for commercial work while possessing the page capacity necessary for single run, multi-section publications. It is capable of operating at speeds of up to 50,000 copies per hour.
